Key dates: August 2013

I'm a Scientist Get me out of here — Australia

What do you have to do?

☐ **Send your profile photo to admin@imascientist.org.au** - by Monday 12th August

☐ **Fill in your profile** - by Friday 16th August

☐ **Test live chats** - Any one of the following: Wednesday 21st August 11am, Thursday 22nd August 1pm and Friday 23rd August at 2pm (all times are AEST)

Answer questions on the website

Have live chats with students

> From Monday 26th August - Friday 6th September

Key dates

Monday 12th August - Site goes live for teachers

Monday 19th August - Site goes live for students

Please put your profile up as soon as you can. This gives teachers time to introduce the event and do background work. Use this time to play around with the site and see how it works.

Wednesday 21st, Thursday 22nd, Friday 23rd August (times above) - Drop-in chat sessions

We'll have drop-in chat sessions in the 'staffroom' chatroom so come along and say hi! This is also a great chance to meet each other, ask any questions, and familiarise yourself with the chatroom set up. Remember, we work in AEST across the I'm a Scientist, Australia site, so those of us in SA/NT/WA have to adjust.

Monday 26th August - Event begins

It may be quite quiet for the first couple of days while students log in, but be ready for a rush of questions. We will notify you by email of the live chat sessions booked by teachers. Please respond in the chat booking comment thread to say whether you will participate in each live chat.

Tuesday 3rd September - First eviction

When polls close the scientist with the FEWEST votes will be evicted. You will be notified by email of the result, good luck! There will be evictions every day for the rest of the week. Scientists will be emailed, and evictions will be announced on the site at 3pm each day, so that it's before the end of the school day. Evicted scientists will still be able to update their profile.

Friday 6th September, 3pm - The final result

The polls close for a final time and we announce the winner in each zone of I'm a Scientist, Get me out of Here! in Australia.
